823,000 MMBTU
OF NATURAL GAS SAVED
SINCE 2008, EQUIVALENT TO
CONSERVING APPROXIMATELY
148,251 BARRELS OF OIL.

383 MILLION KWH
OF ELECTRICITY SAVED
SINCE 2008, EQUIVALENT
TO NEARLY 35,000
AVERAGE U.S. HOMES.

1.2 BILLION GALLONS OF WATER
SAVED SINCE 2008, EQUIVALENT TO
NEARLY 2,000 OLYMPIC-SIZED POOLS.

MGM RESORTS INTERNATIONAL®

MGM Resorts International is dedicated to providing support and services to help organizations, who share the same passion for environmental responsibility, extend these values when planning a meeting.

A green meeting is an event in which environmental considerations are incorporated into all elements of planning and execution in an effort to minimize the environmental impact.

We can help. Just by hosting a meeting at one of our resorts, you are already being environmentally conscious. MGM Resorts International has implemented environmentally responsible efforts through five core focus areas:

Through Green Advantage Meetings, our teams will work closely with you to understand your sustainability needs and plan an event that ensures the extension of your corporation's values. Our Sales, Convention and Catering teams are committed to helping you reach your sustainability goals.

Our strategic approach to greening your meeting includes five steps:

1. Craft a Green Advantage Meeting Goal
2. Choose Meeting Segments and Impact Areas
3. Select Actions from the Menu of Services
4. Explore Green Advantage Meeting Profile
5. Understand Future Opportunities

As you continue to plan your event, please consider the environmentally responsible options and services outlined in the Green Advantage Meetings program. You can be confident that by selecting any green practices within our segment areas you are successfully reducing your carbon footprint and negative impact on the environment.

If you have any questions regarding the Green Advantage Meetings or provided services, please contact your Sales or Convention Manager.

Thank you for your commitment.

GREEN MEETING GOAL STATEMENT:

The following exercise is intended to assist you in crafting a goal statement that drives the environmental elements of your meeting or event. By aligning with your company's environmental philosophy and focusing within dedicated meeting segments, the action plan sets up easy implementation of services and options that will successfully lower the environmental footprint of your event and attendees.

DEFINING YOUR GOAL:

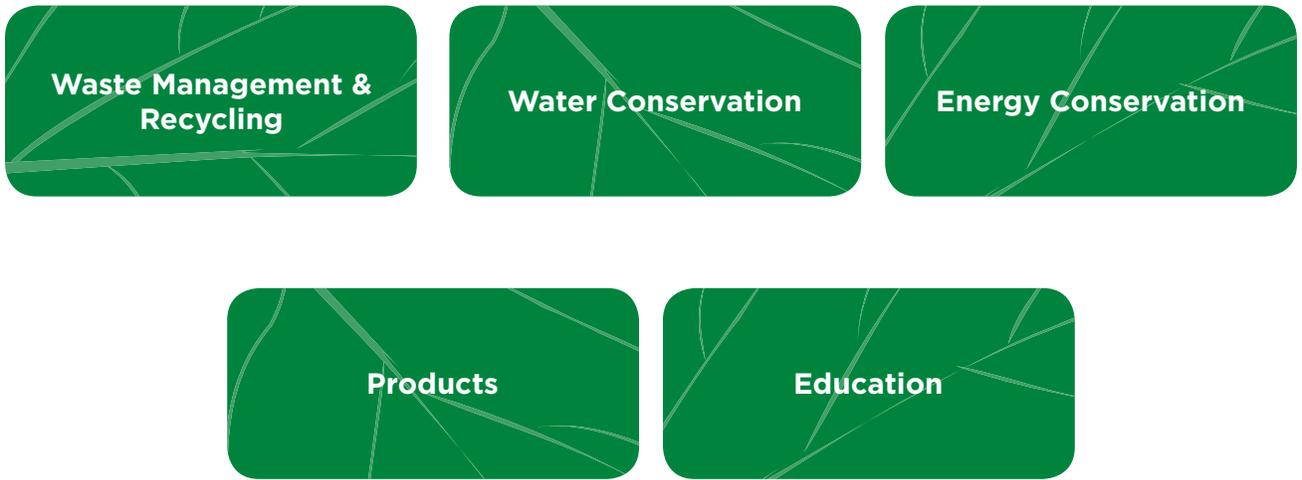

Our team is dedicated to assisting you with developing and achieving your environmental goals within your meeting or event. Our destination has many alternatives and options for meeting this goal. Below you can craft your goal statement and design a scope for meeting that goal.

What is your organization's current mission or philosophy on environmental responsibility?

What environmental impacts does your organization currently focus on?

Please choose the area(s) of impact that best align with your organization's current focus and/or goals:

MEETING SEGMENTS:

This guide outlines the main segments within a meeting and organizes them to allow you to (a) focus on the specific area that aligns with your corporate policy and values and (b) identify the many opportunities there are throughout the scope of the event to incorporate sustainability elements.

Please choose the meeting segment(s) you would like to focus on for environmental responsibility:

- VENUE** In addition to implementing sustainable practices into your event, leverage and opt-in to the venue's environmental efforts and conservation practices.
- EVENT SETUP** Opt-in to energy, water and waste-smart services and options that can help you achieve your company's conservation goals, while further improving the environmental footprint of event attendees.
- EXHIBITION** Design, procure and implement sustainable exhibits, materials and practices that decrease your event output and carbon footprint.
- FOOD & BEVERAGE** Meet your catering needs using sustainable procurement options which reflect responsible sourcing and products with environmentally-conscious lifecycles.
- TRANSPORTATION** Reduce the emissions of your meeting and attendees by incorporating walkable, low-energy and smart-fuel transportation options into your event.

GOAL STATEMENT:

Now that you have identified your corporate philosophy, intended impact areas and meeting segment focus, utilize those intentions to craft your goal statement.

GOAL STATEMENT:

SUSTAINABLE PRACTICES MENU

In order to achieve your desired level of sustainability, MGM Resorts International is happy to provide you with a diverse set of sustainable practices and options within the meeting segments identified below. Our menu of services incorporates services unique to MGM Resorts and APEX/ASTM Environmentally Sustainable Meeting Standards.

As you continue to customize your green meeting, we have further categorized the green services and options to represent their relative impacts. Your selections will determine the level of sustainability your event can achieve. The level is denoted by the color and number of icons.

Please review the following menu of services and choose items and practices to be implemented into your green meeting.

VENUE

In addition to implementing sustainable practices into your event, leverage and opt-in to the venue's environmental efforts and conservation practices.

WHAT WE DO

- MGM Resorts has 15 Green Key-rated destinations from Green Key Global. Five resorts have received “5 Keys” from Green Key Meetings: ARIA, Vdara, Bellagio, Mandalay Bay and MGM Grand.
- TripAdvisor® has recognized 14 MGM Resorts' properties in their GreenLeaders program including the only Platinum Awards for ARIA, Vdara and ARIA Sky Suites.
- All guests participate in a linen reuse program within guest rooms.
- Guest rooms are equipped with individual heating/cooling controls.
- Guest rooms are equipped with low-flow water fixtures.
- Phone books are available if requested, but no longer offered in guest rooms.
- All public space restrooms are equipped with low-flow water fixtures, nonaerosol air fresheners and Green Seal-certified soap.
- Low VOC materials for paints and carpets were/are used.
- The primary lighting in the convention area utilizes energy-efficient bulbs.
- Electricity is conserved by limiting the activation of HVAC to 12 hours prior to the start of an event.
- Meeting room temperatures are set back in unoccupied exhibit spaces.
- Conference spaces are scheduled in an effort to minimize the amount of energy usage.
- The property's annual energy usage is audited.
- All property waste is sorted back-of-house for cardboard, plastic, glass, aluminum, paper, cork, metal, textiles, grease and food waste.
- The Business Services Center only prints a fax when requested by a guest.
- All fax machines and copiers enter an energy-saving mode when not in use.
- E-billing is utilized to reduce the use of paper, shipping costs and labor.
- All plants, shrubs and trees are recycled and reused.

VENUE CONTINUED

In addition to implementing sustainable practices into your event, leverage and opt-in to the venue's environmental efforts and conservation practices.

WHAT YOU CAN DO

Place a volunteer or staff person at each collection area to educate and assist in the front-of-house recycling efforts.

Create talking points on environmental efforts and policies for event and communicate to appropriate on-site staff.

WHAT WE CAN DO TOGETHER

Request a recycling profile for event including the proper management of:

- Paper
- Cardboard
- Plastic
- Glass
- Metal
- E-Waste
- Food Waste/Compost
- Other

Make recycling bins available throughout event.

EVENT SETUP

Opt-in to energy, water and waste-smart services and options that can help you achieve your company's conservation goals while further improving the environmental footprint of event attendees.

WHAT WE DO

- Meeting planning communications are sent electronically.
- Unused convention items, such as pens, are donated to the Teacher EXCHANGE™
- Nonperishable food items are donated to Three Square™, a local food bank, once a year for their canned food drive.
- We encourage suppliers to progress their sustainability programs and utilize sustainable services and products.
- Waste Bins are single-stream and all recyclables are sorted back-of-house.
- Cleaning products are nontoxic and Green Seal certified.
- Convention Center carpet is cleaned using low-moisture extraction to reduce the amount of chemicals released into the environment.

WHAT YOU CAN DO

Choose to use electronic signage - LED displays, hotel monitors, etc.

Set up a paper reduction program inclusive of the following:

- Online communications

- Online registration

- Post-event electronic survey

- Marketing materials in other media format (flash drive or CD)

- Print on both sides

- Lightest weight paper or badge stock

- Sustainable design (no bleeds, standard sizing, light ink coverage)

Set up an administrative paper reduction program:

- Post-consumer or recycled content paper

- Send all staff documents electronically

- Use a master staff binder on site

- Print on both sides

Employ environmentally conscious shipping practices (reusable crates).

Document sustainable elements of event to be used for future use, setting of policies, goals and objectives.

If additional equipment is brought in for event, request the use of energy-efficient and/or water-smart equipment be used.

Purchase high-quality, verifiable carbon offsets for attendees/conference to neutralize use of greenhouse gas emissions.

Provide attendees the ability to purchase carbon credits.

EVENT SETUP CONTINUED

Opt-in to energy, water and waste-smart services and options that can help you achieve your company's conservation goals while further improving the environmental footprint of event attendees.

WHAT WE CAN DO TOGETHER

Opt out of preset items:

- Candies
- Notepads
- Pens

Use recycled-content paper flipboards.

Set up volunteering events or fundraising events for attendees to participate in that support the local community, environmental efforts, etc.

Establish an enhanced recycling program for the event:

- In-room communication regarding single-stream recycling bins.
- Request and setup containers for the recycling of batteries.
- Request and setup containers for e-waste recycling.

Utilization of floral:

- Opt for reusable floral.
- Use live plants instead of cut floral.
- Set up the donation of floral and/or plants to the property of local nonprofit for reuse.

Utilize LCD flat panel monitors as an alternative to plasma.

Adjust lighting based on meeting event volume and schedule.

Provide additional waste collection stations as necessary throughout meeting space.

Request your event carbon footprint.

EXHIBITION

Design, produce and operate sustainable exhibits, materials and practices that decrease your event output and carbon footprint.

WHAT WE DO

- Shut down meeting rooms when not in use.
- Installation of advanced lighting controls that are programmable.
- Temperatures are set back in unoccupied exhibit spaces.
- Conference spaces are scheduled in an effort to minimize the amount of energy used.
- Single-stream waste and recycling containers are provided to ensure proper recycling by participants.

WHAT YOU CAN DO

Distribute an articulated environmental policy with guidelines and objectives to exhibitors by Exhibitor Prospectus and/or e-newsletter.

Communicate necessary information to exhibitors, vendors and suppliers in an environmentally responsible manner using either an Exposition micro-site, online ordering and/or email.

Planner shall require that all exhibitor's promotional items meet one or more of the following:

- Renewable resource
- Reusable/devoid of logos
- Minimal packaging
- Recycled content
- Natural fibers
- Consumable (i.e. food)
- Does not provide promotional items

Include a list of participating organizations for an onsite donation program and include in the exhibitor kit.

Distribute anti-idling educational material in exhibitor communications.

Provide exhibitors the ability to purchase carbon credits to offset the carbon footprint of their booth/display and provide documentation from a verified carbon offset program.

Implement a measurement that appropriately rewards exhibitors who are meeting or exceeding the set forth minimums in the GMEPP guideline.

WHAT WE CAN DO TOGETHER

Request a recycling service in the Meeting Center for:

Cardboard	Metal
Paper	E-waste
Plastic	Food waste
Glass	Wood

Request exhibitors to turn off both electricity and show lights after show hours.

FOOD & BEVERAGE

Meet your catering needs through sustainable procurement options which reflect responsible sourcing and products with environmentally-conscious lifecycles.

WHAT WE DO

- All food waste is composted or converted to pig feed.
- All corks are reused or recycled.
- Condiments are served in bulk when appropriate and approved by the Health Department.
- All indoor meal functions use china and glassware.
- Plastic is not used unless requested by the group.
- All front-of-house linens that are not up to standards are cut and reused as polishing cloths or kitchen towels.
- All food boxes are made from 100% recycled material.

WHAT YOU CAN DO

- Require conference attendees to sign up for meals in an effort to accurately plan quantities and reduce food waste.
- Print menu on recycled materials and/or use vegetable-based ink.

WHAT WE CAN DO TOGETHER

- Request a vegetarian or vegan menu.
- Require that condiments be served in bulk, such as:

Coffee Creamer	Ketchup
Sugar	Mustard
Salt	Mayonnaise
Pepper	Soy Sauce
Vinegar	Other
- Request that any disposable napkins, utensils, plates, serveware or cups be:
 - Compostable/biodegradable/bio-based
 - Recyclable
 - Made with recycled content
- Request sustainable coffee and beverage options.

TRANSPORTATION

Reduce the emissions of your meeting and attendees by incorporating walkable, low-energy and smart-fuel transportation options into your event.

WHAT WE DO

There is a strict no idling policy for vendors and suppliers.
Automated people movers are available throughout MGM Resorts.
Electric vehicle chargers are available at ARIA, The Shops at Crystals™, Bellagio, Mandalay Bay, MGM Grand, Mirage, Circus Circus, New York-New York, Luxor and Excalibur.
Alternative-fuel vehicles are given parking preference.
Excalibur provides a wide range of amenities within walking distance that minimizes the need for transportation.

WHAT YOU CAN DO

Provide a list of hotel's connecting trams and walkways.
Promote alternative transportation options in outreach and communication materials such as:
Circulate no idle flyers to all applicable service providers.
Request a no idling policy that adheres to the GMEEP transportation definition.
Contract shuttle companies that comply with anti-idling policies and signs.
Offer carbon offsets to meeting attendees.

WHAT WE CAN DO TOGETHER

Request the use of MGM Resorts' compressed natural gas limousines or Cadillac Escalades.
Contract with alternative fuel transportation suppliers.
